

**20 ideation  
cards for  
sustainable  
innovation**

How might we  
**remake our  
product into  
a service?**

How might we  
**make it easier for  
users to repair  
the product  
themselves?**

How might we  
**provide a  
maintenance  
service to sustain  
the life of the  
product?**

How might we  
**encourage**  
**customers and**  
**partners towards**  
**greater sufficiency**  
**or slower**  
**consumption?**

How might we  
**use waste, circular  
supplies or  
recycled materials  
as our input?**

How might we  
**add value to our  
waste or used  
products, and sell  
them to other  
customer groups?**

How might we  
**localise**  
**production closer**  
**to our partners/  
customers or**  
**source our**  
**materials locally?**

How might we  
**make better use  
of idle resources  
in our organisation  
and value chain,  
both tangible and  
intangible?**

How might we  
**share data with  
partners to create  
new circular  
service offerings?**

How might we  
**work together**  
**with partners or**  
**competitors to**  
**maximise the use**  
**of infrastructure**  
**or assets?**

How might we  
**collaborate with  
partners or  
competitors to  
create a closed  
loop system or  
create industry  
wide change?**

How might we  
**make a service  
business model  
inspired by  
ecosystems in  
nature?**

How might we  
**stimulate**  
**collaboration and**  
**sharing between**  
**our customers?**

How might we  
**laser-focus on a  
user outcome to  
slim down our  
offering and make  
it less resource  
intensive?**

How might we  
**charge for  
product usage  
or the results  
customers  
achieve instead  
of ownership?**

How might we  
**change the  
purpose of the  
organisation  
towards greater  
sustainability?**

How might we  
**take ownership to  
more of the  
product lifecycle  
and user journey  
to retain value and  
minimise costs?**

How might we  
**embed technology  
into materials or  
products to gather  
data on how we  
can increase value  
or decrease waste?**

How might we  
**retain value by  
providing our  
offering through  
leasing, licensing  
or subscriptions?**

How might we  
**add value to  
existing assets,  
materials or  
products and  
incorporate them  
into our service?**
